USA	NAME OF PRODUCT: System Sensor reflected beam smoke detectors UNITS: About 610 DESCRIPTION This recall involves System Sensor's reflected beam smoke detectors with model number BEAM1224S and date codes 2111 through 3053. The YMMW format date codes stand for (2111) 2012-November-1st week of Nov. through (3053) 2013-May-3rd week of May. The detectors are ivory and black and measure 10 inches high by 7½ inches wide. The model number and date code are printed on a label on the back of the detector's cover and on the product's packaging. The reflected beam smoke detectors were used primarily in commercial buildings as part of the fire alarm system. Detectors used with acceptable power supplies, as listed on the company website, do not need to be replaced. IMPORTER Unknown MANUFACTURED IN: United States 	HAZARD: When used with certain power supplies, the reflected beam smoke detectors can fail to send a signal to the fire alarm control panel that sounds the alarm and fail to alert occupants of a fire. INCIDENTS/INJURIES None reported	Owners with the affected smoke detectors powered by a power supply that is not on the company's acceptable list available online, should contact System Sensor to receive free replacement smoke detectors. System Sensor and its distributors are contacting purchasers directly.

The bicycles are black with red and white stripes. "P5" is on the seat tube, "Cervélo" is on the top tube and a large "é" is on the down tube in white lettering. The handlebars consist of four major components: a base bar, which attaches to the bike; a forward extension mount, which attaches to the base bar; forearm rests and forward extension bars, which attach to the forward extension mount. The base bar is black with red and white stripes and has "3T" on the top and rear. The handlebars come with both a high and a low forward extension mount, one of which will be installed based on customer fit. Consumers can purchase an ultra-low forward extension mount separately. The words "Ultimate Performance" are on the forward extensions. The handlebars were manufactured between January 2012 and July 2012. Serial numbers for the handlebars are on a label inside the base bar under the stem cap on the rear wall. The serial number is the seven-digit number following "FM78-Basebar-." The manufacture date code is the first four digits of the serial number in the MMY format. Date codes for the defective handlebars range from 1201 to 1207. USA	<p>NAME OF PRODUCT: Lion Force Boys' Puffer Coats</p> <p>UNITS: About 2,400</p> <p>DESCRIPTION This recall involves boys' black hooded coats with dark gray drawstrings around the hood. The coats are 100% nylon on the outer shell with a zip-off hood. The wrist cuffs and waist band are elasticized. There are two front Velcro-flap pockets and an inner stow pocket on the coats. "Lion Force" is printed on the upper left side of the front of the coat and on the sewn on tag at the back of the neck. This recall involves boys' coat sizes 4 through 12.</p> <p>IMPORTER Unknown</p> <p>MANUFACTURED IN: China</p> 	<p>HAZARD:</p> <p>The jackets have a drawstring through the hood which can pose a strangulation hazard to children. In February 1996, CPSC issued guidelines about drawstrings in children's upper outerwear. In 1997, those guidelines were incorporated into a voluntary standard. Then, in July 2011, based on the guidelines and voluntary standard, CPSC issued a federal regulation. CPSC's actions demonstrate a commitment to help prevent children from strangling or getting entangled on neck and waist drawstrings in upper outerwear, such as jackets and sweatshirts.</p> <p>INCIDENTS/INJURIES None reported</p>	<p>Consumers should immediately remove the drawstrings from the garment to eliminate the hazard or return the garment to Lion Force Inc. for a full refund.</p>

The importation of asbestos or goods containing asbestos into Australia is prohibited under the Customs (Prohibited Imports) Regulations 1956 (Customs Prohibited Import Regulations).</p> <p>HAZARDS</p> <p>There is a possible risk of consumers accessing the asbestos in these goods. Exposure to airborne asbestos fibres can cause asbestosis, lung cancer and mesothelioma.</p>	<p>The ACCC commissioned a scientific risk assessment of the recalled fire wallets found to contain asbestos. That risk assessment concluded that the health risk from the use, handling or disposal of these products was much lower than the risk commonly associated with asbestos in building materials, home renovation or industrial exposure to asbestos.</p> <p>The risk assessment concluded that accidental disposal of these products via standard garbage collection would present a negligible risk to garbage workers. The dictionary definition of negligible means so small or unimportant as to be not worth considering; insignificant.</p> <p>However, environmental protection laws in all states and territories prohibit the disposal of asbestos via standard garbage collection and these products should be taken to an asbestos disposal facility. Your nearest asbestos disposal facility can be located with the online tool on the Asbestos Safety and Eradication Agency (ASEA) website (asbestossafety.gov.au/search-disposal-facilities).</p> <p>Consumers should telephone the asbestos disposal facility before taking the double-bagged fire wallets to the facility, as disposal costs can vary widely. Consumers should inform the facility that they need to dispose of a recalled fire wallet that contains a very small amount of asbestos. Brisbane Illusions are offering a exchange / refund under the recall of these goods. Consumers can also ask Brisbane Illusions to reimburse them with any reasonable disposal costs and they should retain receipts for this purpose. Consumers should not send these products in the mail.
